

Auto Film Coater

This equipment is used to automatically apply ink, paint, adhesive and emulsion resin to paper, film and metal, using a film applicator such as baker applicator, doctor blade, bar coater and film applicator equipped with a micrometer. This eliminates irregularities in application and differences among the operators.

Specification:

Model No. EGPI-1210-B

- | | |
|-------------------|--|
| 1) Painting stand | Polished glass W 280×L 450mm with SUS vat |
| 2) Stroke | 330mm approx. |
| 3) Painting speed | 10~200mm/sec , variable |
| 4) Applicator jig | For doctor blade etc. |
| 5) Power supply | AC100V |
| 6) Dimensions | W 60×D 48×H 30cm approx. |
| 7) Options | For bar coater (φ1/4 , 1/2") jig
