

## Transparent Glass Cell

Likely "2E-CELL-SUS", this test cell is for analyzing electrochemical research and development of batteries of the cycle tests and the characteristic tests with the impedance analyzer. It is possible to visually observe the phenomenon of the cell through the glass body during the cycle tests and the stability tests.

### Specification:

Model No. TKT-610

- 1) Dimensions : Dia.60mm x Height60mm
- 2) Material : SUS304, Quartz glass
- 3) Cell sizes : CR2016, CR2032
- 4) Select PP or PTFE stopper depends on the electrolyte.
- 5) Options : You may select the material other than SUS304.
